Sovit International Limited, established in 2015, is a leading provider of intelligent engineering solutions tailored to meet the evolving demands of the construction industry. Driven by innovation and guided by the principles of quality and professionalism, we have built a reputation for delivering sustainable and impactful solutions that empower our clients.

Innovating Solutions, Engineering the Future

Sovit International Limited was founded in 2015 with a mission to provide innovative engineering solutions that address the evolving needs of the construction industry. With a foundation built on professionalism, quality, and sustainability, we have established ourselves as a trusted partner, delivering customized solutions that drive growth and efficiency for our clients.

Starting with just two employees, our company has steadily grown to a dynamic team of 53 professionals, each bringing expertise and passion to their roles. This growth reflects our dedication to continuous improvement, embracing new technologies, and meeting the ever-changing demands of the market. At Sovit, every project is an opportunity to raise the bar in service delivery while building lasting relationships with our partners.

Our name, Sovit, embodies our core philosophy: Solve it. This principle guides every aspect of our work as we craft intelligent, effective, and sustainable solutions. Whether we are designing infrastructure, integrating renewable energy systems, or providing mechanical and electrical services, we remain committed to shaping the future with smart, impactful engineering.

Our Services

Building Construction

Our Building Construction services focus on creating durable, sustainable, and innovative structures that stand the test of time. From residential and commercial buildings to industrial facilities, we deliver projects that blend quality, functionality, and aesthetics. Our experienced team ensures every detail is executed with precision, adhering to the highest industry standards.

Civil Works

Sovit International delivers top-tier civil works and infrastructure development services, ensuring durable, efficient, and sustainable solutions for diverse projects. From roads and bridges to drainage systems and site preparation, we apply cutting-edge techniques and industry best practices to guarantee quality and longevity in every project.

Water Works

Sovit International specializes in designing and constructing efficient water infrastructure solutions, ensuring reliable access to clean water for communities, industries, and commercial developments. Our expertise covers borehole drilling, water treatment, pipeline installation, and reservoir construction, delivering sustainable and high-quality water management systems.

ICT Infrastructure Construction Services

Our ICT Infrastructure Construction services focus on designing and building robust telecommunications structures such as cell towers and network towers. We ensure these infrastructures meet the highest standards of reliability, efficiency, and sustainability. With a team of skilled professionals and advanced technologies, we deliver solutions that support modern connectivity needs while ensuring seamless integration with the environment.

↘ **Architectural Design**

Our Architectural Design services blend creativity, functionality, and sustainability to bring your vision to life. We specialize in delivering designs tailored to meet your unique needs, ensuring every project reflects innovation, quality, and purpose. From concept development to detailed plans, our goal is to create spaces that are not only visually striking but also highly practical and environmentally conscious.

↘ **Project Management & Contract Administration**

Our Contracting and Project Management services ensure the seamless delivery of your projects, from inception to completion. We combine technical expertise, meticulous planning, and effective coordination to execute projects on time, within budget, and to the highest standards. Whether it's a large-scale development or a small renovation, we provide end-to-end solutions tailored to meet your needs.

↘ **Engineering Design & MEP Services**

We specialize in comprehensive engineering design and MEP (Mechanical, Electrical, and Plumbing) services to ensure the seamless functionality of buildings and infrastructure. Our expert team integrates innovative engineering solutions with energy-efficient and sustainable designs, delivering high-performance systems that meet industry standards and client needs.

↘ **Bills of Quantities (BoQ)**

Our Bills of Quantities (BQ) services ensure transparent, accurate, and efficient cost estimation for your construction projects. We prepare detailed documentation that outlines material requirements, labor, and other associated costs, providing you with a clear roadmap for budgeting and resource planning. Our expertise helps minimize risks, prevent cost overruns, and ensure the successful completion of your projects.

Our Team

Our Mission

To deliver high-quality, sustainable, innovative engineering solutions within time frames to address the changing needs of society by integrating innovative technologies and practices.

Our Vision

To become a leader in providing smart, cutting-edge engineering solutions while contributing to the sustainable growth of industries and communities across the globe.

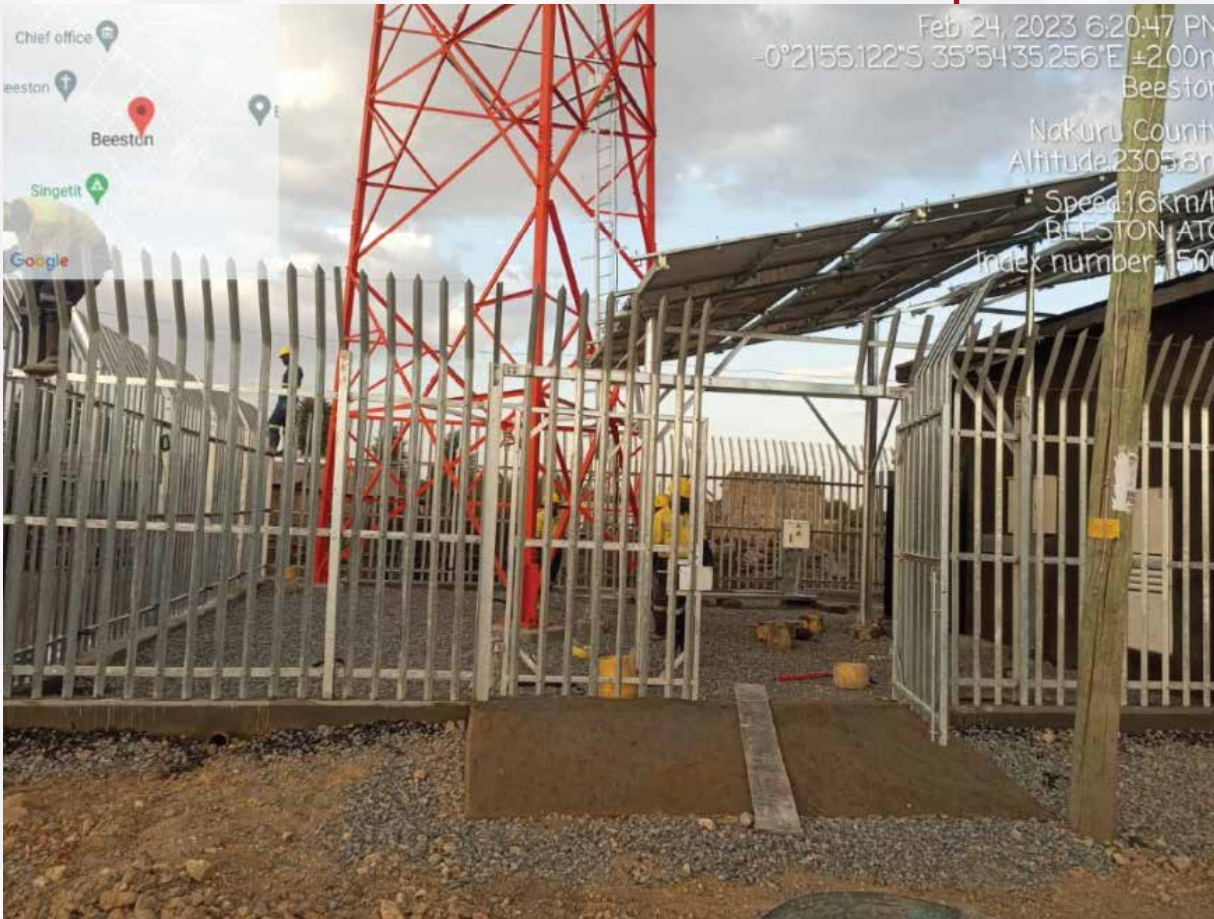

Our Projects

BEESTONE BTS(BASE TOWER STATIONS)

The project involved the erection of a 45-meter-high communication tower, complete with the construction of tower foundation bases and earthing works. Additionally, the scope included building a secure bunker to house communication equipment and a generator, installing a reliable solar power backup system, and constructing a durable palisade wall fence for enhanced security.

Client:	<u>American Tower Corporation</u>
Project Location:	<u>Bestone, Nakuru County</u>
Project Type :	<u>Sub-Contract Works</u>
Project Cost:	<u>Kshs 6.1 Million</u>
Dates:	<u>January 2023- February 2023</u>

KAYS ESTATE BTS(BASE TOWER STATIONS)

The project involved the erection of a 45-meter-high communication tower, including the construction of tower foundation bases, earthing works, and a secure bunker to house communication equipment and a generator. The scope also included the installation of a solar power backup system and the construction of a durable palisade wall fence to ensure security and reliability.

Client:	American Tower Corporation
Project Location:	KAYS estate, Kenyatta rd Kiambu County
Project Type :	Sub-Contract Works
Project Cost:	Kshs 5.7 Million
Dates:	November 2022-January 2023

OSANANKARURI BRIDGE BOX CULVERT

The project involved the construction of a 20-meter bridge across the Osanankururi River, deep in Mau Forest, Nkareta Ward, Narok County. The works encompassed earthworks, excavations, concrete works, formwork, and the installation of guardrails. Despite the challenging terrain, Sovit International successfully delivered the project within a three-month period.

Client:	Narok county Government
Project Location:	Nkareta Ward, Narok County
Project Type :	Contract Works
Project Cost:	Kshs 35 Million
Dates:	July 2024–November 2024

NOONKOPIT BRIDGE BOX CULVERT

The project involved the construction of a 20-meter bridge across the Noonkopit River, deep in Mau Forest, Nkareta Ward, Narok County. The scope included earthworks, excavations, concrete works, formwork, and the installation of guardrails. Despite the challenging terrain, Sovit International successfully completed the project within three months.

Client:	Narok county Government
Project Location:	Nkareta Ward, Narok County
Project Type :	Contract Works
Project Cost:	Kshs 15 Million
Dates:	July 2024 - November 2024

EKATTERA (LIPTON): REPAIR AND MAINTAINANCE OF 6NO GUYED HIGH WIRE MASTS

The project involved comprehensive maintenance and upgrades for a guyed mast, including the replacement of bolts and nuts for mast segments, galvanized guy wires, photocell sensors, and aviation warning lights. The scope also included reinforcing base and support anchors, replacing turn-buckles and D-shackles, and repainting the guyed mast. Additionally, the team re-installed and tested the grounding and lightning arrestor kit, replaced all warning signs and labels, and installed a new rope-based fall arrest safety system, ensuring enhanced safety and functionality.

Client:	Lipton (Ekattera Holdings)
Project Location:	Lipton farms, Kericho County
Project Type :	Sub-Contract Works
Project Cost:	Kshs 1.8 Million
Dates:	March 2023-May2023

NYANCHWA AFFORDABLE HOUSING PROJECT(KISII COUNTY)

The project involved preliminary works, demolitions, and the construction of 200 affordable housing units within two 10-storey apartment blocks. The scope also included the construction of a commercial center, installation of a septic tank with sewer line connections, drilling and equipping a borehole, and constructing water storage tanks. Additionally, the project covered civil works and fencing to ensure functionality and security.

Client:	State Dept. of Housing & Urban Dvt.
Project Location:	Kitutu Chache Constituency, Kisii County
Project Type :	Main Contract Works
Project Cost:	Kshs 475 Million
Dates:	October 2023-December 2025

TIMAU AFFORDABLE HOUSING PROJECT

The project involved preliminary works, demolitions, and the construction of 200 affordable housing units within two 10-storey apartment blocks. The scope also included the construction of a commercial center, installation of a septic tank with sewer line connections, drilling and equipping a borehole, and constructing water storage tanks. Additionally, the project covered civil works and fencing to ensure functionality and security.

Client:	State Dept. of Housing & Urban Dvt.
Project Location:	Timau Town Buuri Constituency, Meru County
Project Type :	Affordable Housing Project -Contract Works
Project Cost:	Kshs 800 Million
Dates:	October 2024-December 2025
